

& Tradition[®]

Paying homage to Denmark's long-standing design heritage, &Tradition bridges old and new by creating furniture, lighting and interior objects with timeless appeal.

From reissuing design icons to creating future classics in collaboration with acclaimed international designers, the collection combines craftsmanship with creativity and shapes carefully considered pieces with purpose and meaning.

Always respectfully. Always made to last.

CLASSICS AND NEW ICONS

Functionality, minimalism and pure, sleek lines defined Danish Modernism throughout the 50s and 60s, where design and furniture-making were the product of meticulous craftsmanship and resulted in the creation of timeless products.

Here at &Tradition we collect iconic works by modernist mid-century artists, including Arne Jacobsen and Verner Panton, and match them with designs by some of the most acclaimed contemporary designers. This year, we are expanding our collection with pieces from the 50s to today.

A series of tables, chairs and lamps by modernists Peter Hvidt and Orla Mølgaard Nielsen were retrieved through old sketches and will join the &Tradition family – some produced for the first time ever. Both Copenhagen natives and trained furniture makers, the duo are renowned for the simplicity of their work and were among the first to introduce relatively inexpensive pieces to produce and export on an international scale. The line includes Hvidt & Mølgaard's elegant Drawn chair, different editions of the Drop Leaf table, and the sculptural Tripod lamp.

We are also adding a brand-new collection of accessories – ranging from cushions, to throws and planters – named &Tradition Collect, introducing a whole set of smaller-scale home objects designed by Space Copenhagen. Each piece from &Tradition Collect can be easily mixed and matched with others and reflects our commitment to crafting high quality and long-lasting products.

Our collection of contemporary furnishing and lighting will also see several new entries: Space Copenhagen's newly-designed Lucca portable lamp is inspired by the dreamy, smooth glow of a lantern where the light source is enclosed in a white opal glass and Hee Welling's Patch is an extendable dining table built out of high quality wood and employs a butterfly extension technique to provide extra seating.

Browse the following pages and let yourself be inspired by an ever-evolving collection blending reissued timeless classics with newly-designed contemporary works.

1968

Spanning decades of timeless design icons – from Verner Panton’s norm-breaking Flowerpot lamp first produced in the late 1960s to Arne Jacobsen and Flemming Lassen’s Mayor sofa designed specifically for Søllerød’s city hall located in the outskirts of Copenhagen - &Tradition’s collection of furniture, lighting and interior objects ranges from reissued mid-century classics to contemporary pieces.

Once fought-over by design appreciators at auctions around the world and available to only a handful of people, many of our products - including the Mayor sofa, Viggo Boesen’s Little Petra chair and some of the newly-added Hvidt & Mølgaard designs - are retrieved from original sketches and produced on a large scale for the first time ever.

2013

2018

2020

Alongside such mid-century gems are a number of contemporary pieces, the work of some of today’s most acclaimed international artists: Valencia-based Jaime Hayon, local studio Space Copenhagen, Swedish-raised designer Sami Kallio and Norwegian duo Anderssen & Voll – to name a few.

Hee Welling

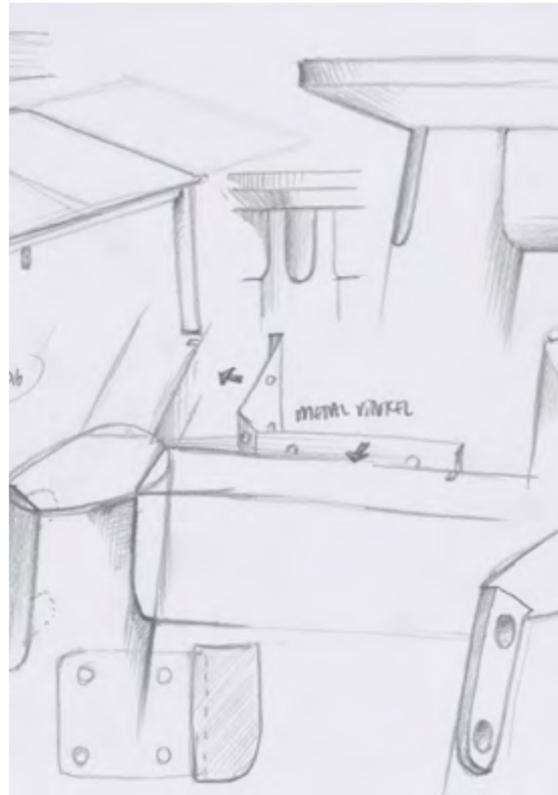

An award-winning furniture designer, Hee Welling was raised in the Danish countryside and attended The Royal Danish Academy of Fine Arts before setting up his own Copenhagen studio in the early 2000s. His works, exhibited at multiple fairs and museums, can be found in building interiors around the world, from Oslo's Opera House to Australia's Parliament in Canberra.

Welling's designs are characterised by clean lines and simple silhouettes, and involve a wide array of materials, with wood and metals used alongside non-natural elements like plastic. While decidedly modern, Welling's work draws inspiration from some of Denmark's most renowned designers, including Arne Jacobsen and Hans J. Wegner, and seek to continue their legacy with carefully crafted pieces that prioritize logic.

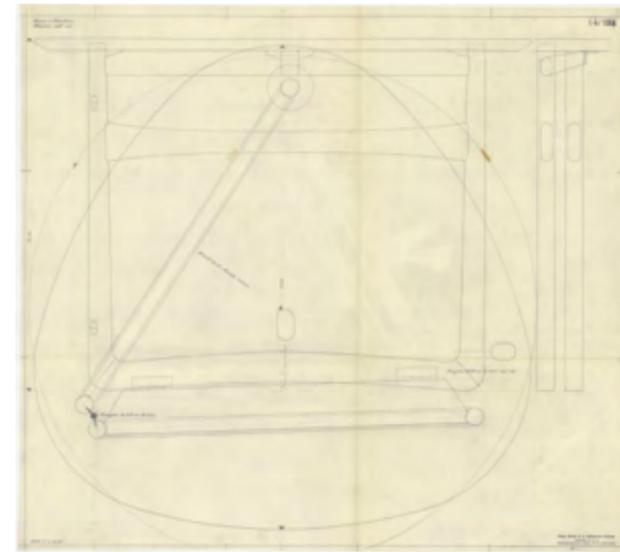

This year, &Tradition is adding Hee Welling's Patch to the collection: an extendable dining table that melds minimalist form with a user-friendly design and is built out of high-quality wood. In designing the piece, Welling was inspired by the Danish concept of 'umage' – roughly translated as "making a bit more effort," – by ensuring that Patch's design was considered to provide optimal practicality.

Hvidt & Mølgaard

Both Copenhagen natives and passionate furniture designers, Peter Hvidt and Orla Mølgaard Nielsen met while teaching at the Danish School of Arts and Crafts and established their own practice in 1944. Hvidt and Mølgaard's work was a pioneering force in 1950s Danish design and in the advancement of industrialized production of furniture. They introduced products that were easy to produce on a mass scale and were relatively inexpensive to export: their 1944 Portex was the first-ever stackable chair and the 1950 AX collection won international praise.

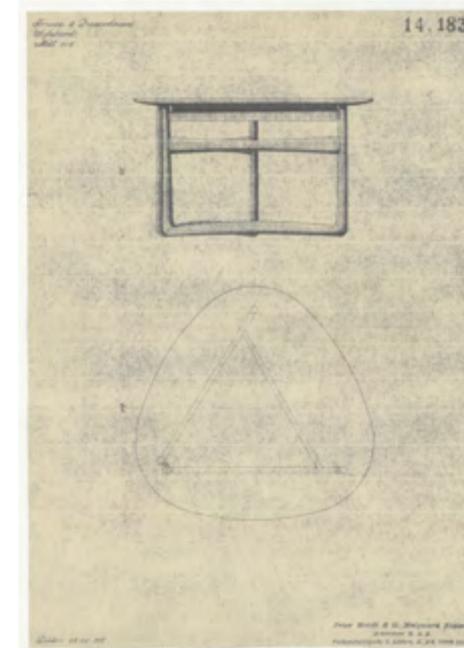

Throughout their career, the duo's work received significant appreciation, leading to the production of as many as 250 different pieces of furniture and lighting designs and collaborations with important carpenters and firms. Some of their most relevant works are now being reissued by &Tradition, including the elegant Drawn chair, different editions of the Drop Leaf table, and the black sculptural Tripod floor lamp - strictly following and respecting Hvidt and Mølgaard's craftsmanship and design.

Marianne Panton & Verner Panton

Drawing, Catch JH1 chair

Jaime Hayon

Verner Panton

Verner Panton started out as a painter and went on to study architecture at the Royal Academy of Fine Arts in Copenhagen. Following an apprenticeship with architect and designer Arne Jacobsen, he dedicated his time to furniture and interior design, becoming known for a series of norm-breaking works - including chairs without legs and sofas placed vertically against walls. Throughout the 60s and 70s, his passion for designing environments led to the creation of immersive interiors featuring hypnotic patterns and futuristic-looking furniture, lighting, wallpapers, posters and rugs.

Panton's pioneering use of materials, colours and shapes earned him the reputation as a visionary.

One of his best-known designs, the Flowerpot lamp, was emblematic of the Flower Power peace movement during the 60s and, with its range of vivid colours, it remains an enduring classic. "Verner's intention was to create an interesting new lamp which had never been seen before," recalls the artist's wife Marianne, who had a significant influence on her husband's creative process over the years. "The bright, shiny enamel, and the coloured cable had never been seen in lighting fixtures before."

Flowerpot VP4 table lamp

Klunderbie, 2016: Hayon Studio Valencia

Valencia-born artist and designer Jamie Hayon opened his own studio in 2000 and has designed countless pieces of furniture, lighting fixtures and home accessories, decorating hotel interiors and retail spaces around the world. Hayon is at the forefront of a new wave of talents blurring the lines between art, decoration and design.

Now operating offices in Italy, Spain and Japan, the designer is keen on exploring new and expressive forms, while maintaining a deep respect for artisan skills, finely-crafted details and a passion for play.

"The collaboration with &Tradition has for me always been interesting," says Hayon. "It has been a dialogue on my style and their style, proper collaborative approach and a real exchange of knowledge."

Anderssen & Voll

Based in Oslo, partners Torbjørn Anderssen and Espen Voll have been instrumental in putting Norway on the global design map since joining forces in 2009. Anderssen & Voll have received numerous international awards for their work within furniture, lighting and home accessories, including the Wallpaper* Design Award, the Red Dot and iF Awards.

Rather than feeling defined by and confined to a specific way of being, Anderssen and Voll prefer to be open, by developing emotionally-driven designs. *“We’re not dogmatic about it,”* they say. *“We’re quite open. We start designing and watch a piece take on its own personality. It’s almost like breathing life into it.”*

Among their most relevant projects, the duo designed the graceful and elegant Pavilion chair specifically for Copenhagen’s Langelinie Pavilion, a multi-functional venue housed in an all-glass modernist building. *“We wanted to bridge the old and the new with a curvaceous chair as opposed to the typical rigid lines you often find,”* add Anderssen and Voll. *“With its slim lines flowing through the air, it’s a bit poetic. Almost like a delicate rope that came undone.”*

All the Way to Paris

All the Way to Paris started as a graphic design duo in 2004 and has since evolved into an award-winning group with a passion for pushing boundaries by exploring a broad spectrum of projects within visual communications - from graphic identities, to museum catalogues, exhibition graphics and intriguing design objects.

For founding partners Tanja Vibe and Petra Olsson Gendt, their raison d’être stems from a Scandinavian no-nonsense approach to design, where they continuously seek to eliminate the unnecessary.

With The Moor, a collection of rugs carefully hand-woven with a loom machine through hours of meticulous work, the duo focused on the shape, colour and texture, leaving out patterns and decorative elements. *“For us, a rug brings all the elements of a room together in harmony, creating a feeling of closeness,”* notes Tanja Vibe and Petra Olsson Gendt, Founders and Partners.

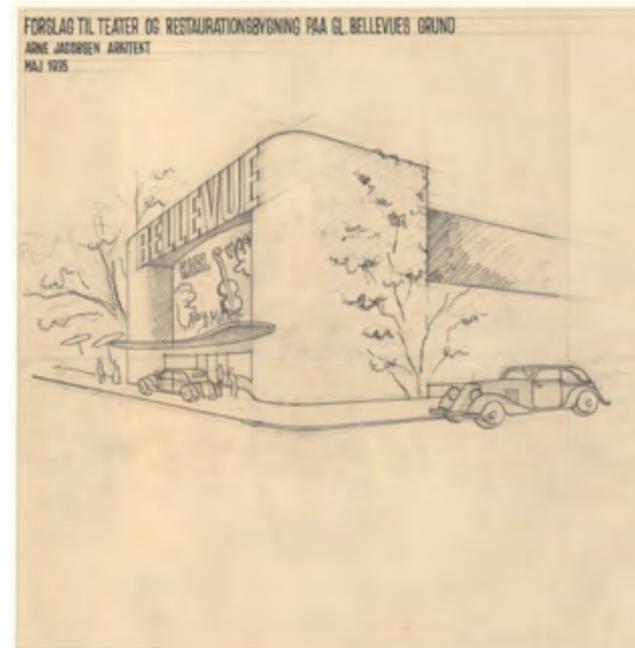

Arne Jacobsen

Widely considered as one of the most influential Danish architects and designers to date, Arne Jacobsen defined Modernism with his clean, pure lines, coupled with classic craftsmanship. One of his most celebrated buildings is the 1960 SAS Royal Hotel, where he designed every detail from sculptural furnishings, such as his elegant Swan and Egg chairs to the lighting, textiles, ashtrays and cutlery.

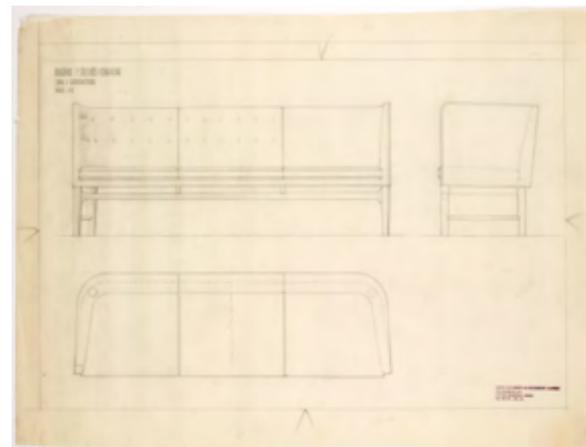

&Tradition's collection includes two of Arne Jacobsen's most early designs; the Bellevue lamp and the Mayor sofa.

Bellevue, with its characteristic slender swan-neck and sculptural figure, reflects Jacobsen's purity and sense of proportions, which he believed was the fundamental factor in design. Originally launched in 1929, the lamp was inspired by Bauhaus and signalled the dawn of Scandinavian minimalism.

The Mayor sofa was designed in the late 1930s together with architect Flemming Larsen specifically for Søllerød's city hall in the outskirts of Copenhagen. With a simple look and a distinguishing stiff-backed shape, the Mayor sofa keeps captivating design lovers today.

&Tradition Collect Planter SC43

Space Copenhagen

Established in 2005 by Signe Bindslev Henriksen and Peter Bundgaard Rützou, Space Copenhagen is a design studio working across multiple disciplines from furniture, lighting and refined objects, to art installations, art direction and interior design for private homes, hotels and restaurants all over the world.

The ambition is to forge new paths by balancing opposites: classic and modern, industrial and organic, sculptural and minimal. The studio's intuitive approach embodies designs that are distinctively shaped by the given circumstances, functional needs, and a fundamental interest in human behaviour. It is a sense of and belief in slow aesthetic that centres quality and longevity.

Among numerous designs for &Tradition, Space Copenhagen is behind &Tradition Collect, an offering of carefully crafted soft furnishings and home objects, ranging from cushions to throws and planters.

Drawing, &Tradition Collect Planter SC43-45

CRAFTMANSHIP

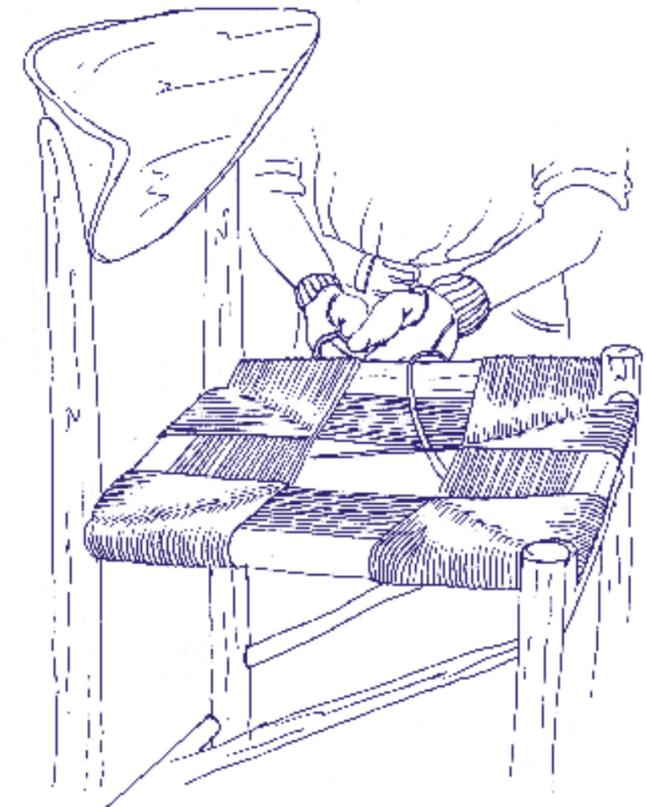

Before entering living rooms, bedrooms and backyards, our products are handcrafted to the finest detail by highly skilled and experienced artisans. From Little Petra's rigorous hand stitching, to mouth-blown lamps with a unique and distinctive look, and handloom woven rugs, each piece carries its own story.

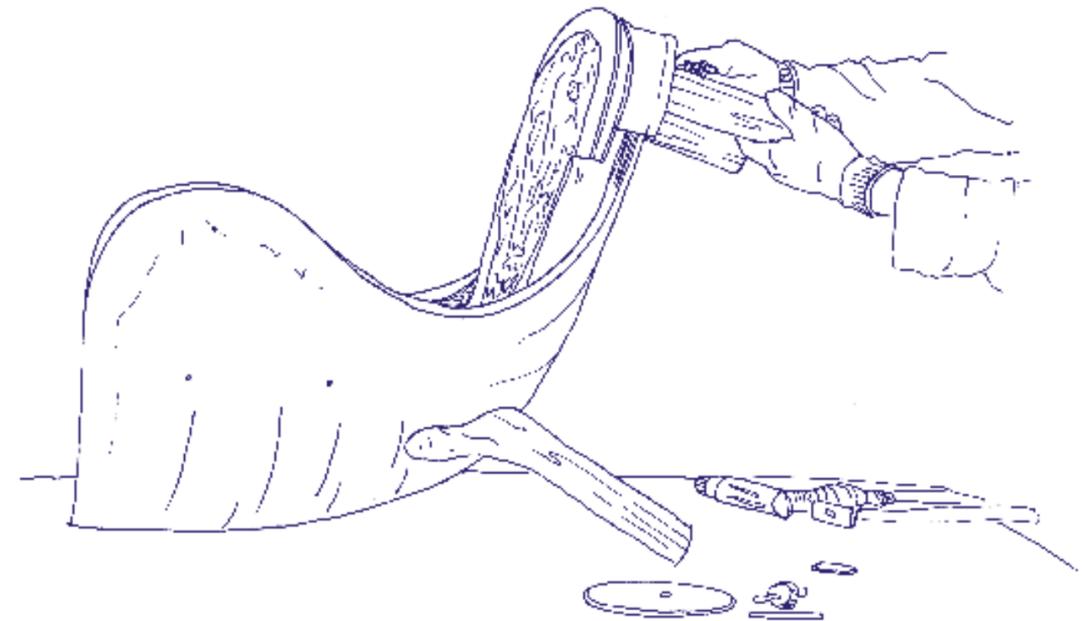

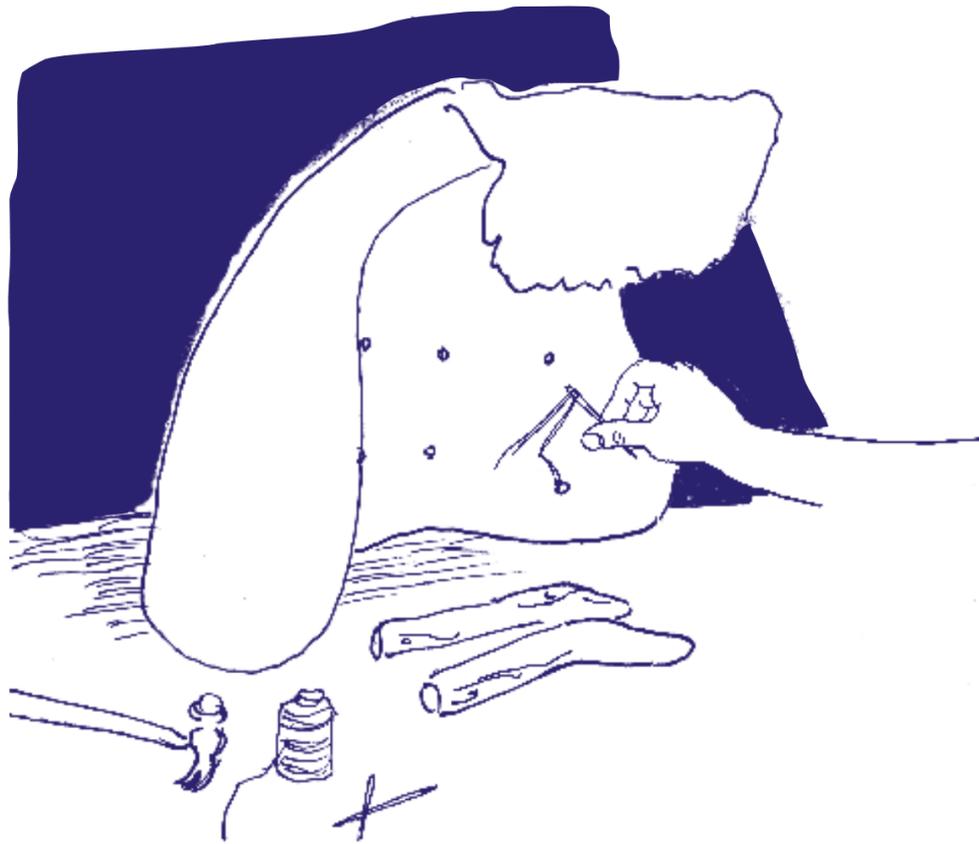

Some of our products are retrieved from original hand-drawn sketches and produced for the first time in decades – the newly-launched collection by Hvidt & Mølgaard, for example - others are newly-designed works by acclaimed contemporary artists. But there is one aspect that both reissued mid-century pieces and today's designs have in common: an enduring reliance on high-quality craftsmanship. Through an extreme and tireless attention to detail, we strive to put out products that are built to last and result from the passion and dedication of skilled craftsmen.

HAND-WOVEN FOR HOURS

First designed by duo Hvidt & Mølgaard in the 1950s, the Drawn chair is a recent addition to the &Tradition collection and is the result of attentive and meticulous hand-weaving techniques. The chair boasts a solid form built out of oak or walnut and its sculptural backrest is produced from a special formpressed and milled oak or walnut veneer.

The chair's comfortable seat is built out of more than 100 meters of unbleached natural paper cord, carefully handwoven through hours of dedicated manual work.

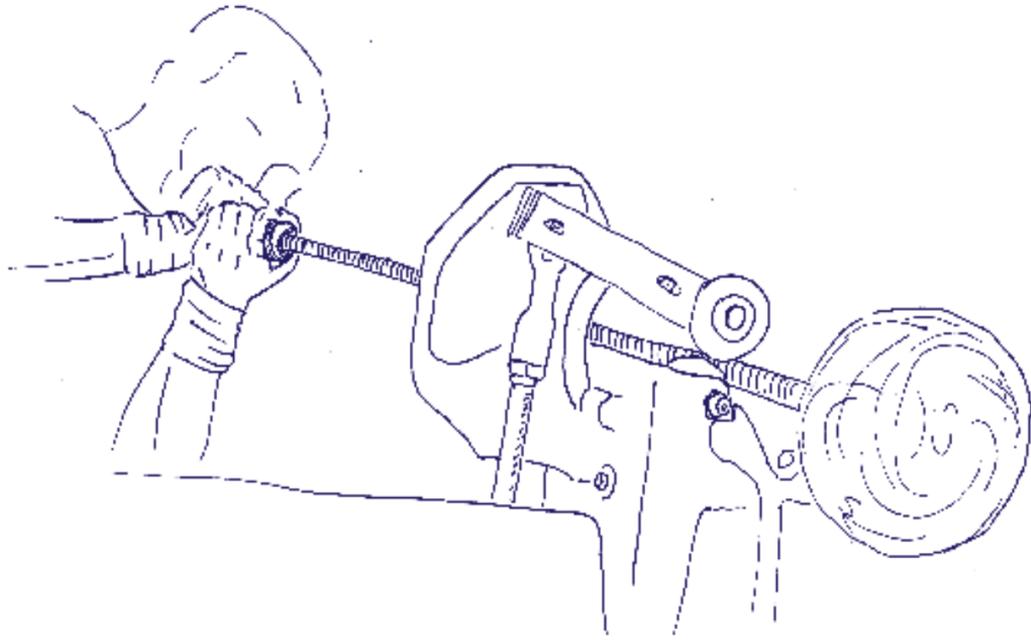

THE CRAFT BEHIND LITTLE PETRA

Viggo Boesen's Little Petra, characterised by its compact size and an open, embracing shape, was first exhibited at Copenhagen's Cabinetmakers Guild Exhibition in 1938. But while its production at the time was limited to a handful of samples, fought over by design-savvy auctioneers around the world, Boesen's quality-focussed craftsmanship endured over the years.

Today, Little Petra's components are carefully crafted and assembled following special techniques. The chair's resistant inner frame and structure, which enables its open, round shape and comfortable seating, is hand built from high quality wood; the short yet sturdy legs are carefully milled into shape from one piece of solid oak or walnut; and the chair's upholstery is attentively cut and stitched – all exclusively done by hand.

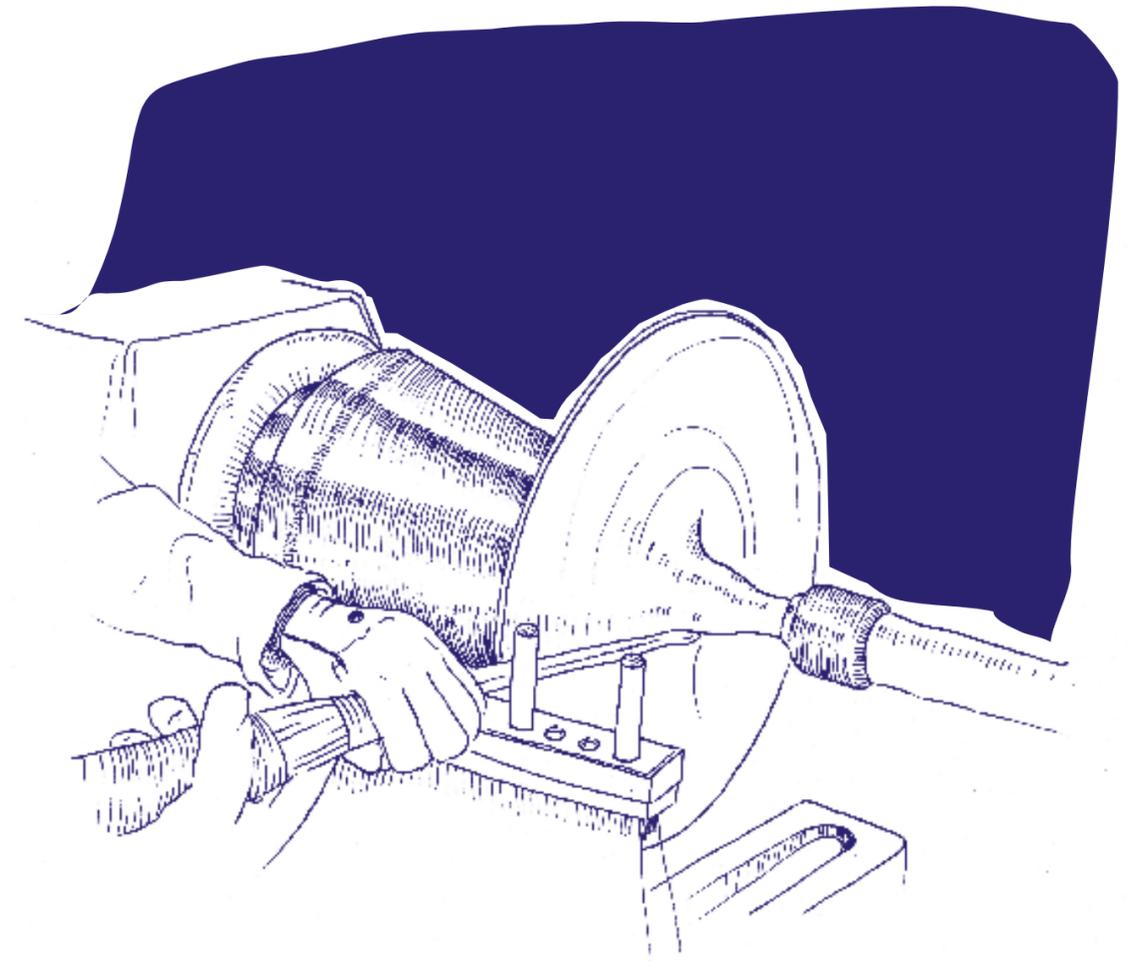

HANDSPUN LAMPS

Designed by Arne Jacobsen in 1929, the Bellevue lamp blends early 20th-century Scandinavian minimalism and the functionalism of Bauhaus. The lamp's production respects Jacobsen's rigorous attention to craftsmanship and detail: most notably, Bellevue's distinctive 45-degree cut light shade is built out of a single piece of metal and is hand-spun following traditional spinning techniques.

MOUTH-BLOWN GLASS

As the name suggests, Samuel Wilkinson's Blown lamp is made from artisanal mouth-blown glass, meaning that each piece looks unique, and is the work of highly-qualified glass masters. The pendant is attentively blown into a fixed mould that embellishes the glass with a quilted pattern, and one of the variants is decorated with silver tones through a traditional lustre painting technique.
